Kaltrina Ajdini

ARCHITECT

Architect from Prishtina with experience across public buildings, housing, interiors and cultural heritage — from concept design through construction documentation and site supervision. Detail-oriented, a fast learner and a strong team player who works well across several projects at once. My goal is always to give better shape to the built environment through beautiful, functional architecture.

Experience

Freelance Architect — Current

PIKA 3D, Chicago

Intern Architect — Sept – Nov 2019

Ministry of Culture, Youth and Sport, Prishtina

- Worked with historians, sociologists, archaeologists and craftsmen on restoration and conservation processes
- Measured and documented cultural heritage sites under temporary protection
- Identified and evaluated monuments and their surroundings; reviewed technical interventions
- Digitised data, presented current conditions and prepared proposals for emergency interventions

Architect — 2016 – 2019

New Dimension Architecture, Prishtina

- Managed commercial and residential projects with budgets up to €6 million
- Designed across all phases, from concept through construction documentation; developed 3D models
- Prepared construction drawings and documents, reviewed construction plans and monitored on-site workmanship
- Consulted with clients on functional and spatial requirements of new structures
- Coordinated approvals with municipal building departments and other agencies; carried out pre-design research for regulatory compliance
- Worked with security engineers and private-sector firms; created and updated project cost analyses

Modelling & rendering, VIProduct, Prishtina

SketchUp
3D modelling & documentation, VIProduct, Prishtina

Education

Master of Technical Sciences — Architecture 2012 – 2020

University of Prishtina "Hasan Prishtina", Faculty of Civil Engineering and Architecture

KEY MODULES

Architectural Design, History of Arts, Architectural Structures, Construction Materials, Contemporary Systems, Engineering Structures, Structural Mechanics, Urban Design and Environmental Protection, Spatial Structure, Organization and Construction Technique, Interior Architecture, Protection of Architectural Heritage, Traditional Housing in Kosovo

Volunteer experience

Heritage Lab — "Refinding the Heritage of Letnica" June – July 2019

Cultural Heritage without Borders (CHwB) Kosovo

An educational programme on documenting, preserving, reviving and interpreting cultural heritage through hands-on work and lectures by international and national experts. With the local and national coordinators we drafted a development plan for the village of Letnica and continued the revitalisation of the Mill of Frrok Dokiqi.

"Santefaction" — access in public spaces June 2015

Kosovo Architecture Festival

A workshop on Prishtina's public spaces in transition from collective to private ownership. Working with residents of an apartment block around the former "Sante" café, we mapped the existing situation and explored the site's potential for socialising, interaction and children's play.

Selected projects

200 S Wacker, Chicago	Scan-to-BIM & paving coordination
Primary School	Public facility
Olympic Pool	Public facility
Office Building	Public facility
Flexible Housing	Residential
Geodes Office	Interior design
